铺贴施工步骤示意图说明:

- 1、本公司产品建议选用专业粘结剂及填缝料，部分产品应选用中性粘结剂。（请留意包装内说明）
- 2、铺贴基面清理后，用专业灰刀平刮2-3 mm厚糊状粘结剂。
- 3、用齿状慢刀在抹平的糊状粘结剂上刮出波浪状条纹。
- 4、铺贴马赛克，注意联与联之间的留缝与产品自身留缝宽度一致。
- 5、轻压马赛克表面，让其找平并吃浆均匀。
- 6、约20小时，马赛克完全凝结糊状粘结剂后，用海绵慢刀把填缝料填满空隙。（软质工具避免刮伤产品表面）
- 7、约半小时，待填缝料半干湿状态时，用高密度海绵沾清水抹入1-2mm凹缝，可以更好地突出产品折光效果。
- 8、最后用干毛巾清洁完成施工。

Construction steps for paving and sticking

Drawing description of paving construction steps:

- 1.We suggest to adopt professional adhesives and joint filler,And parts of our products adopt neutral adhesives. (See interior instruction)
- 2.Use special ash knife to sweep 2-3mm thickness adhesive after cleaning to pavement surface.
- 3.Use dentation trowel carve to score out waviness on the flat mushy adhesive.
- 4.Paving mosaic.Pay attention to align the joints between mosaics with the joints between the product network adhibits.
- 5.Tenderly pat the surface of the mosaic and leveling treatment to make sure it is adhesive evenly.
- 6.About 20 hours later when mosaic is totally adhesive,use the special sponge knife to fill the joint fillers in the gaps.(Soft tool to prevent damaging product surface)
- 7.After 30 minutes,when the joint filler is semi-dry,use wet high density sponge to fill into joint about 1-2mm , which can better show the highlight effect of the product.
- 8.Use dry towel to clean and finish the construction finally.
